An unusual phenomenon was witsessed by many persons in this city last Saturday at noon. A shower had just passed over and the clouds lay piled up on the northern horizon, while the sun, almost at its farthest southern limit, shown through rifts in the clouds ficating athwart the sky to the eastward. An indescribable haze formed across the north, and as the suns rays reached it the colors of a rainbow were hogs, by Elmer Shrout, of Poyner, and distinctly visible. The bow was of per-W. H. Murdoca, of Ponder. Mr. feet form, but was longer and straighter and farther down on the horizon than rainbows formed in the east or west. A rainbow in the north is a rarety, no one of our oldest citizens remember having seen such a phenomenon before, but the many who saw it last Saturday can testify that it was there, and was as plainly visible as anything of the kind ever seen in the eastern sky after a shower on a summer evening.

A Satisfactory Growth.

The Ripley County Bank Statement. printed on another page of this issue of the DEMOCRAT, shows evidence of growth that is pleasing to the citizens of the county who are interested in the Current View, but the others remained progress and well-doing of our people. The bank has always been, since its establishment in 1891, a well managed institution, and a credit to the county, but during recent years it has grown in strength more rapidly than in any other period since its inauguration. A comparison of resources of the bank during the past five years will demonstrate more forcibly the fact that Ripley county is growing, than any other one fact that can be presented in as few words.

Thursday, from the jury of awards of In 1900 the resources were. \$ 93,861 82

This comparison shows a steady and ratifying iner ble evidence of the prosperity of the citizens of the county.

The Doniphan Lumber Co.

W. H. Horton came home from his recent trip to Heber, Ark., last Saturday night, driving up from Neeleyville. In conversation with Mr. Horton he stated that the Doniphan Lumber Company would in all probability build their contemplated new mill at Pangborne, near Red river, and about half way between Searcy and Heber, or about 15 miles from either place. The Rock Island railroad has run its permanent line through Pangborne and it is building the line on the west. The proposed new mill will have about twice the capacity of the mill here, that is, it will be built to out 100,000 feet per day, and will consist of two mills, a big one and a little one. The plant will be complete in every detail, with all the latest appliances for the expeditious handling of all kinds of timber. With the timber purchased last week from the Fullerton Co., of St. Louis, the Doniphan company will have timber enough to keep them going, should they ron to their full capacity every day, for the next 25 or 30 years. It will take them about a year to construct the new plant, and they expect to begin work on it shortly after the beginning of the new year. In case they do not dispose of the plant here they may move some of the machinery to the new plant, but the deal with the W. T. & T. Co. for the pine timber in Shannon and other inties north and northwest, has no yet fallen through, and should that deal e consummated the plant will be over auled and started up again here, as hat would give them about night or ine years sawing here. Pangborne is a little hamlet of a
